SUMMARY

Senior Software Engineer with 8+ years of experience architecting and scaling high-traffic web platforms for millions of users using React and PHP. Consistently recognized for high productivity, system reliability, and maintaining clean code standards. Currently completing a Master's in Management Information Systems to blend technical expertise with strategic business execution. Passionate about driving architectural excellence, team mentorship, and robust product delivery in a Senior or Technical Lead capacity.

EXPERIENCE

PT. TRANS DIGITAL MEDIA (DETIKCOM) | JAKARTA, INDONESIA

Software Engineer (Frontend Web) *| Nov 2021 - Present*

- Handled the frontend development and maintenance for 8+ high-traffic news platforms (including CNN Indonesia, CNBC Indonesia, Rekomendit, FYB, Beautynesia, Haibunda), completing over 460 development tickets in the last 4.5 years.
- Managed the end-to-end UI redesign for InsertLive. By coordinating closely with the team, we completed the modernization process within a tight 1-month deadline with zero operational disruption.
- Built a reusable Vertical Video component that was adopted across multiple media portals, helping the engineering team cut down redundant development time for future rollouts.
- Actively monitored system health and technical debt, resolving 45+ critical production issues via Kibana and completing 20+ SonarQube optimization tasks to ensure clean, maintainable code.
- Maintained a strong track record of delivery, consistently ranking as the top contributor in the team for 3 consecutive years based on productivity, logging accuracy, and low error margins.
- Guided pre-merge code reviews to maintain architectural standards (e.g., reducing cyclomatic complexity and keeping functions modular) and regularly helped distribute team workloads to ensure the team met its collective KPIs.

Tech Stack: PHP, React JS, JavaScript, Git, AMP, Jest, PHPUnit
Frameworks: Phalcon, ReactJS

PT. SIGMA CIPTA CARAKA (TELKOMSIGMA) | JAKARTA, INDONESIA

Technical ERP Consultant *| Jan 2019 - Nov 2021*

- Played a key role in the digital transformation of enterprise clients, specifically building custom web solutions to modernize their Supply Chain and E-Invoice processes.
- Developed seamless integration pipelines between frontend web applications and Oracle databases, enabling real-time data synchronization.
- Managed and optimized Oracle E-Business Suite (EBS) databases to ensure data integrity and reliable system performance.
- Generated complex business reports using Oracle SaaS and RTF Report to support management in data-driven decision-making.

Technologies used: PHP, PL/SQL (Oracle), RTF Report, Oracle EBS, TOAD.

PT. LABEL INOVASI INDONESIA (LABEL IDEAS & CO) | JAKARTA, INDONESIA

Web Developer (Frontend) | *Nov 2017 - Dec 2018*

- Built responsive, cross-browser compatible frontend platforms for various clients using HTML, SCSS, and JavaScript.
- Integrated custom user interfaces with Content Management Systems (CMS) and MySQL using CodeIgniter (CI2/CI3) to support dynamic content updates.
- Collaborated with cross-functional teams to implement CMS solutions and database integrations.

Technologies: HTML, CSS, SCSS, PHP, MySQL, CMS
Frameworks: CodeIgniter (CI2, CI3)

PT. IBM INDONESIA (IBM) | JAKARTA, INDONESIA

Application Developer Intern | *May 2017 - Nov 2017*

- Assisted in developing cross-platform mobile applications using React Native and Ionic.
- Utilized IBM Design Thinking methodologies to map user journeys and build features that aligned with client requirements.

Technologies: HTML, CSS, NodeJS, PHP
Frameworks: Laravel, React Native, Ionic

EDUCATION

BINA NUSANTARA UNIVERSITY (BINUS) | JAKARTA, INDONESIA
Master of Management Information Systems | 2024 - 2025

- **GPA**: 4.00
- **Focus**: Digital Transformation, System Integration, and Business Strategy.

BINA NUSANTARA UNIVERSITY (BINUS) | JAKARTA, INDONESIA
Bachelor of Computer Science | 2013 – 2017

SKILLS

Technical Skills:

- Languages: JavaScript (ES6+), PHP, SQL, HTML5, CSS3/SCSS
- Frontend & Mobile: React.js, React Native, Ionic, AMP
- Backend & Frameworks: Laravel, CodeIgniter, Phalcon, Node.js
- Databases & Enterprise: MySQL, Oracle EBS, PL/SQL, E-Invoicing & Supply Chain Integrations
- Testing & Tools: Jest, PHPUnit, Git, JIRA, Kibana, SonarQube, TOAD, Redmine, REST API
